

## SW Update Method for iLX-W650E (AP model)

**Important !!** Pls make sure that icon “Information” is active or not before recovery. If no, Pls make it active by Connect unit to power (acc/power) but not park brake. When unit turns on, wait for 1 minute then connect park brake...

### Start to recovery

1. Format USB memory by FAT 32.
2. Store this folder “iLX-W650” on a USB memory.
3. Insert USB memory to H/U , then power on H/U
4. Go to MENU => SETUP => INFORMATION =>FW UPGRADE as Figure 1

Figure 1

**Remark :** Pls ignore even though H/U show “No file” on screen after connecting USB memory

5. Push FW Upgrade. This procedure should take about 1 minute.  
After that, H/U will reboot when the update has finished as Figure 2

Figure 2

6. Check version  
Go to MENU => SETUP => INFORMATION  
After update this SW, it must be changed to V1.009\_0809\_F002
